Coast Guard, DHS § 156.205

liquids that are compatible with the hose tube as recommended by the hose manufacturer.

- (f) The frequency of the tests and inspections required by this section must be:
- (1) For facilities, annually or not less than 30 days prior to the first transfer conducted past one year from the date of the last tests and inspections;
- (2) For a facility in caretaker status, not less than 30 days prior to the first transfer after the facility is removed from caretaker status; and
- (3) For vessels, annually or as part of the biennial and mid-period inspections.
- (g) If a facility or vessel collects vapor emitted from a vessel cargo tank with a vapor control system, the system must not be used unless the following tests and inspections are satisfactorily completed:
- (1) Each vapor hose, vapor collection arm, pressure or vacuum relief valve, and pressure sensor is tested and inspected in accordance with paragraphs (b), (c), and (f) of this section;
- (2) Each remote operating or indicating device is tested for proper operation in accordance with paragraph (f) of this section;
- (3) Each detonation arrester required by \$154.820, \$154.826(a), and \$154.828(a) of this chapter or 46 CFR 39.40–3(d), and each flame arrester required by \$154.826(a), \$154.828 (a) and (c) of this chapter has been inspected internally within the last year, or sooner if operational experience has shown that frequent clogging or rapid deterioration is likely; and
- (4) Each hydrocarbon and oxygen analyzer required by §154.820(a) and §154.824 (d) and (e) of this chapter or 46 CFR 39.40-3(a) is calibrated:
- (i) Within the previous two weeks, or
- (ii) Within 24 hours prior to operation when the vapor control system is operated less frequently than once a week.
- (h) Upon the request of the owner or operator, the COTP may approve alternative methods of compliance to the testing requirements of paragraph (c) of this section if the COTP determines

that the alternative methods provide an equal level of protection.

Subpart B—Special Requirements for Lightering of Oil and Hazardous Material Cargoes

SOURCE: CGD 78-180, 49 FR 11172, Mar. 26, 1984, unless otherwise noted.

§ 156.200 Applicability.

This subpart applies to each vessel to be lightered and each service vessel engaged in a lightering operation in the marine environment beyond the baseline from which the territorial sea is measured when the oil or hazardous material lightered is destined for a port or place subject to the jurisdiction of the U.S. This subpart does not apply to lightering operations involving public vessels, or to the dedicated response vessels and vessels of opportunity in accordance with the National Contingency Plan (40 CFR parts 9 and 300) when conducting response activities. These rules are in addition to the rules of subpart A of this part, as well as the rules in the applicable sections of parts 151, 153, 155, 156, and 157 of this chapter.

[CGD 93-081, 60 FR 45017, Aug. 29, 1995]

§ 156.205 Definitions.

- (a) In addition to the terms defined in this section, the definitions in §154.105 of this chapter apply to this subpart and to subpart C.
- (b) As used in this subpart and subpart C:

Lightering or Lightering operation means the transfer of a cargo of oil or a hazardous material in bulk from one vessel to another, including all phases of the operation from the beginning of the mooring operation to the departure of the service vessel from the vessel to be lightered, except when that cargo is intended only for use as fuel or lubricant aboard the receiving vessel.

Marine environment means—
